

Elene Gotsiridze (Tbilisi, Georgia)

Radiologist, MD

It was an honor to receive the ESPN training grant, through which I was able to visit the University Clinic in Cologne, department of Pediatric Radiology.

I became part of the ongoing discussions at the pediatric radiology department and took part in kidney diseases research meetings. I had a chance to meet extraordinary doctors and persons, with whom I'll continue to collaborate.

I would like to say special thanks to Professor Friederike Korber, Pediatric Radiologist who is an excellent teacher as well as an incredible person, and his team. He made sure that I was involved in all diagnostic procedures as well as in research and educational activities and continuously shared his knowledge and expertise. Also Pediatric nephrologist, Professor Lutz Weber, without him my visit wouldn't have been possible.

I would also like to mention the young professional team – being part of them was both challenging and motivating.

Skills and knowledge gained during this training will help me to improve and my daily practice with the new methods.

I am happy I had the opportunity to be part of their team. Their attitude towards patients and the atmosphere in the team is truly exceptional.

Thank you ESPN for providing me this training grant!
